Adrián Arboledas Azañón

Junior Software Developer · Cloud (AWS) · Flutter · Web

Barcelona (Mollet del Vallès), Spain · Spanish (EU citizen) · arboledasadrian05@gmail.com · +34 647 985 945
linkedin.com/in/adrian-arboledas-1b33b5302 · github.com/arboledas05 · Web CV: arboledas05.github.io/adrianarboledas.github.io

Availability: now, **part-time (afternoons)**; full-time from **April 2027** · **Barcelona:** on-site, hybrid or remote · **rest of Spain, Europe and the Americas:** remote, relocation negotiable · CET (UTC+1/+2): my afternoons overlap with US East Coast mornings

Experience

Web Developer & Google Ads Manager (part-time) — Family-run renovation company · Barcelona area — Apr 2026 – present

- Built and maintain its trilingual Astro website (260+ pages, landing pages per service and per town) and its tracking: GA4, Google Ads conversions, Meta Pixel and Consent Mode v2 (GDPR).
- **Fixed a production tracking bug** (4 conversions recorded vs about 20 real leads, Sep 2026): in DevTools I found the Content-Security-Policy was blocking the inline script (no SHA-256 hash) and Google's conversion endpoints (connect-src); fixed the CSP and verified it in production.
- Run its Google Ads Search campaign (170+ negative keywords, weekly search-term reviews): **9.3% CTR** vs a ≈6% sector average (21 Apr – 27 Jul 2026) and **19 leads from 430 clicks** (8–23 Oct 2026), helping to increase the company's turnover.

Flutter Developer (internship) — Accenture (Tecnilógica Ecosistemas, S.A.U.) · Barcelona — 18 Sep 2025 – 14 May 2026

- ≈435-hour internship (DAM diploma) in a Scrum team; **Flutter app in production for a leading Spanish bank**: in-store consumer financing for large retail chains.
- Dart with GetX; REST API integration (JSON-to-Dart models, authentication, error handling); new screens for the financing flows.
- Fixed complex UX bugs in production (Android, iOS): landscape layouts, sticky footers, overflows, drawer, keyboard and scrolling.
- Responsive UI for phone and tablet; Android APK/AAB builds; GitLab workflow with merge requests, code reviews and continuous integration.

Co-founder & CMO — Growlityc · Barcelona — 2025 – Nov 2026

- Two-partner (50/50) agency offering GoHighLevel CRM automations to dental clinics: built pipelines, workflows, appointment reminders and patient reactivation, and led marketing and outreach (Google Ads, Meta Ads, demos). It closed without reaching paying clients.

Web Developer — Freelance · own and client projects — 2025 – present

- Multilingual websites with SEO (Astro, React, TypeScript, Three.js): servicempro.com (luxury remodelling, Texas, USA) and elevvavisuals.com.

Projects

NexaRetail: highly available three-tier network on AWS — ITB, module 5163 · pair project · Nov 2026
VPC 10.20.0.0/16 across two Availability Zones; public (web) and private (app, data) subnets, NAT for OS updates only, security groups per tier. **My part:** the technical defence of the design (security, maintenance, audit, cost) and a monitoring and audit demo in my own AWS Learner Lab with CloudTrail, CloudWatch, AWS Config and Reachability Analyzer; the console build and the CloudFormation template are my partner's.

AWS migration plan for a case-study company — ITB, module 5160 · pair project
On-premises data centre → AWS (eu-west-1, hybrid): EC2 Auto Scaling from 2 to 10, RDS Multi-AZ, AWS DMS (full load + CDC) for ≈1.6 TB with a weekend cutover; projected yearly cost ≈€150,000 → ≈€72,000, payback in ≈6 months. **My part:** co-author of the plan; I presented the context and the conclusions.

My interactive web CV — code: github.com/arboledas05/adrianarboledas.github.io
Trilingual static site with three.js clay worlds in a single WebGL canvas, an i18n build pipeline and QA tooling.

Education

Higher VET Specialisation Course in Cloud Resources and Services — Oct 2026 – Apr 2027
Institut Tecnològic de Barcelona (ITB) · in progress · official qualification, EQF level 5, 41 ECTS, 700 h · AWS and OpenNebula
